

Queensland Cotton Dalby Gin Storage Sheds

Met-TECH® CASE STUDY

Materials

Metroll Trimclad® Roofing & Walling
Custom Flashings, Gutter and Accessories

The Project

Queensland Cotton specialises in all stages of the cotton marketing process including the acquisition, processing, risk management, sale, classification, storage, transport and export of processed Australian cotton.

Queensland Cotton operates 10 state-of-the-art cotton gins throughout Queensland and New South Wales, with a combined ginning capacity of more than one million bales. Our cotton gins are located in Emerald, Moura, Cecil Plains, Dalby, two at St George, Mungindi, Collarenebri, Wee Waa, and Warren.

Metroll is proud to have been involved in the supply of materials to a significant expansion of storage facilities at the Dalby site.

The project involved the construction of two large steel framed sheds with a total floor area of almost 20,000m²
