

LYSAGHT

MATERIALS, FINISHES AND COLOURS

ROOFING, WALLING, GUTTERING, FASCIA AND FENCING

INSPIRATION TO BUILD BETTER

BRING YOUR VISIONS TO LIFE

As Australia's leading shaper of COLORBOND® steel and other premium roofing and walling materials, Lysaght has the range for any style of structure, in any environment. From the famous COLORBOND® steel range through to stainless steel and aluminium products, we can ensure your project not only looks great, but will last even in the toughest of conditions.

All our steel, stainless steel and aluminium products are available in an array of finishes and colour to create a unique and individual style. And for peace-of-mind you can be comforted knowing our products are backed by a range of warranties from BlueScope¹.

CLASSIC

Designed to weather the unique Australian land, a Classic finish provides a low sheen aesthetic that provides longevity and durability.

MATT

Soft in appearance yet durable and strong, a Matt finish beautifully diffuses light for a textured designer appearance.

ULTRA

For building in marine and industrial environments, Ultra offers another level of specialist protection and durability.

COLORBOND® STEEL

FROM LYSAGHT

FOR ROOFING, WALLING,
GUTTERING AND FASCIA

METALLIC

The Metallic finish showcases long lasting lustre for colour brilliance. A simple play of light brings out the striking 'metallic' effect.

A NOTE ON AVAILABILITY

Not all LYSAGHT® products are available in all materials, finishes and colours shown - contact Lysaght, your reseller, builder, or installer for more information.

SA AND BCA CLASSIFICATION EXPLAINED

SA = Solar Absorptance. The classification of colours in the BCA is based on solar absorptance, which is the inverse of solar reflectance, expressed as a ratio between 0 and 1. A SA value of 0 indicates that a roof absorbs none and a value of 1 indicates that a roof absorbs 100% of the incoming solar radiation. Solar absorptance value is not applicable for SUPERDURA® Stainless steel. See the individual colour swatches for the SA value for each product and colour.

BCA = The Building Code of Australia (BCA) has classified roof colour on the basis of their solar absorptance, referred herein as Light (L < 0.40), Medium (M < 0.60), Dark (D > 0.60). See the individual colour swatches for the ratings available for each product and colour. BCA classification is correct at the time of printing but may be subject to change. Check your local state building regulations at the time of your project.

SUPERDURA® STAINLESS STEEL

FROM LYSAGHT

FOR ROOFING, WALLING,
GUTTERING AND FASCIA

Our ultimate pre-painted steel product for corrosion resistance, suitable for very severe marine environments.

WHY LYSAGHT ONLY USES AUSTRALIAN COLORBOND® STEEL

COLORBOND® steel has been made in Australia since 1966 by BlueScope - Australia's largest steelmaker and a global leader in the manufacture of pre-painted steel.

Decades of Australian research and development have gone into creating a range of technologies that give genuine COLORBOND® steel its long lasting performance in Australia's harsh climate.

Renowned for its quality finish and durability, and backed by a material warranty¹ from BlueScope, COLORBOND® steel is one of Australia's most trusted building materials.

Colorbond®

SUSTAINABILITY

At Lysaght, we manufacture our LYSAGHT® steel building products range from 100% Australian-made metallic coated and pre-painted steel. These ingredient steel products are durable and resilient to Australia's harsh climate and their long life helps conserve resources and energy that may otherwise be invested in products with a shorter life span.

All LYSAGHT® steel building products contain recycled content and the steel in LYSAGHT® products is 100% recyclable. In some cases it can be reused without reprocessing, again saving on energy and resource use.

THERMAL EFFICIENCY

Many people know that the colour of your roof can make a difference to your cooling bill and no less than five of the colours in the COLORBOND® steel range qualify as solar reflective (light coloured) roofing under the Green Star Communities tool. But there's another way that COLORBOND® steel can help make your home more energy efficient. Every colour (except Night Sky®) in the standard COLORBOND® steel range features Thermatech® solar reflectance technology. Thermatech® technology is designed to reflect more of the sun's heat on hot, sunny days, which can mean less dependence on air-conditioning, plus reduced heat stress for your roof. The LYSAGHT® product range is available in the full range of COLORBOND® steel colours.

CORSTRIP® PROTECTIVE PLASTIC FILM

Some LYSAGHT® products shaped from COLORBOND® steel are delivered with a plastic film called CORSTRIP® to protect the product from damage during transport and installation. CORSTRIP® is made from 100% low-density polyethylene (LDPE) and is suitable for recycling.

The colour swatches shown have been reproduced to represent actual product colours as accurately as possible. However, we recommend checking your chosen colour against an actual sample of the product before purchasing, as varying light conditions and limitations of the printing process may affect colour tones and finishes.

Not all LYSAGHT® products are available in all materials, finishes and colours shown. Material, finish and colour availability is indicative only and is subject to change without notice – contact Lysaght, your reseller, builder, or installer for more information.
