

# Tarpping Guideline

**The BlueScope Tarpping Guideline must be followed when carrying any BlueScope product on an open trailer.**

## Why you need to tarp:

- Customer satisfaction and to ensure product quality is not compromised. Product is to be delivered dry.
- Reduce damage claims on BlueScope and the transport carrier.

## When should you tarp?

When it  
is raining

When rain  
is forecast

When the  
road is wet

If you are travelling  
interstate or to  
regional country  
locations

If you are  
pre-loading

If you have  
been advised  
to by BlueScope

## How to tarp:

### Safety

- Always use height safety platforms with a harness to tarp.
- Never stand or climb on product to tarp.

### Equipment

- Ensure tarp or coil bag is the correct size to cover the load completely.
- Ensure the tarp is in good condition, no holes, no tears.

### Record

- Once load is fully tarped, take photos and upload them to SteelDrive.
