

COLORBOND® steel for fencing

Circular Thinking

All COLORBOND® steel contains recycled content¹ and the steel itself is 100% recyclable.

COLORBOND® steel is durable and resilient to Australia's harsh climate and its long life helps keep resources in use for longer.

Green Star

EPDs and ResponsibleSteel™ certification are recognised initiatives under the Green Star Responsible Products Framework and can contribute to a project's Green Star rating. COLORBOND® steel for fencing has an EPD² and is manufactured using steel from a ResponsibleSteel™ certified site, making it a 'Best Practice' product.

Responsible Sourcing

BlueScope's product sustainability credentials are supported by our company-wide sustainability initiatives including responsible sourcing and supply chain sustainability.

BlueScope is a verified supplier under the Steel Sustainability Australia (SSA) programme, meeting best practice ESG standards in the manufacturing of semi-finished steel products.

ResponsibleSteel™

BlueScope's Port Kembla Steelworks is certified to the ResponsibleSteel™ Standard v1.1.

Specifying products from a ResponsibleSteel™ certified site can give businesses and consumers confidence that the steel they use has been sourced and produced responsibly.

Colorbond®

1. Across the range of steel products manufactured by BlueScope in Australia, the average recycled content (according to recycled content categories defined in ISO 14021:2016) in the steel is 25.0%, which includes pre- and post-consumer recycled materials. Scrap and iron-bearing materials generated and reclaimed from BlueScope's steelmaking, including the BF-BOS process up to slab casting, represent 1.7% of the product mass, which is not reported as recycled content. Scrap arising from downstream processes, such as plate and coil milling, rolling, tempering, annealing, pickling, metallic coating, painting, rollforming and/or fabrication are included as pre-consumer recycled content. The figures provided are based on FY23 data.

2. EPDs are available for COLORBOND® steel for fencing products at select metal coating classes and base metal thicknesses (BMTs). Please visit steel.com.au to view the EPD and for the full details of the products covered.
