

## Colorbond Zincolume

Steeline Z Purlins are an ideal product that give long spans between portal frames on your commercial building. Z Purlins are available in different sizes and material strengths to match the design computations of your building. Steeline Z Purlins are made from Galvaspan quality steel and is roll formed to length with holes punched to your specification.

# **Steeline Z Purlins**

STRUCTURAL Z
SECTION PURLINS

### **Application**

Steeline Z section purlins are mainly used for commercial applications but are just as cost effective to be used for smaller type garages and carports. The Z sections can also form part of the columns and rafters in these smaller applications made from Galvaspan steel Z section purlins come in different sizes and thicknesses to cater for your needs.

#### Safe roof purlins spans

The safe spans below are suitable for sheds and class 1 structures with the following assumptions: (Lapped continuous spans of Z Purlin result in increased spanning capability over C section purlins)

#### Non cyclonic sites only

Cpe = 0.9 and Cpi = +0.2

High Pressure Zones KL = 1.5 and 2.0 included

Max roof span allowed - 12M

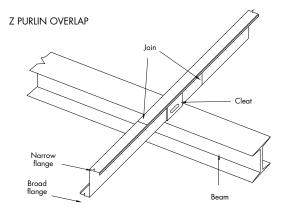

All Spans to have 1 row of bridging

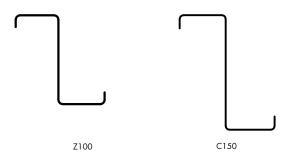

15% Lap must be fitted to all mid supports

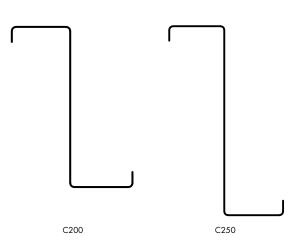

Cleated or bracketed fixing Only - No flange bolting

Results are for at least two spans

Full calculation of requirements using Steeline section properties should be carried out for full verification.

Note: For sizes greater than 250mm check with your local member.
